

Nature brought to life.

Everything the world promised—in a perfect setting.

At The Settings, we're committed to creating places where the wonders of nature combine with everyday life. Guided by respected real estate professionals Richard W. McWhorter and Marc H. Wilson, The Settings Development Companies is committed to environmental stewardship and a thoughtful approach to community design.

When selecting a location for a new community, we choose only the finest land to be found anywhere, places that we ourselves would be proud to call home. And when we find these magical places, we preserve as much of the original landscape as we can, so new homeowners can live in harmony with the scenic wonders and continue in natural traditions as old as time.

While each community reflects an uncompromising regard for the environment, we also have an appreciation for the types of community amenities our customers prefer. In the communities of The Settings, homeowners discover those rare places where they can live at one with nature while they enjoy the best features of contemporary life.

At The Settings, nothing is left to chance.

Balancing innovative community design with a healthy respect for the natural integrity of the land itself, The Settings creates places where people can live the life they've always imagined, in the kinds of places they've always dreamed of.
